

Agricultural Plastic Recycling

The Lower Souris Watershed Has a Grain Bag Roller

We are excited to announce that the LSWC has recently acquired a Grain Bag Roller for residents of the watershed to use free of charge. The roller will be located at the RM of Walpole Shop and will be available 7 days a week. Call to schedule your time.

What Can We Do with Our Grain Bags?

When grain bags are purchased, a fee is applied to help with recycling the bags. You can recycle them for free when returning the grain bag roller.

What Are the Benefits of Recycling?

- Plastics can be used for future bags
- Roll, Recycle, and you are Done!
- Better for the Environment and Wildlife
- Keeps them out of landfills and burns

Why Can I Not Burn My Bags?

Open burning of agricultural plastics is prohibited under the province's Clean Air Act. Avoid fines and protect our watershed by recycling your grain bags.
